

The State of Maine MSCommNet frequency plan is an extremely dynamic environment considering the unpaired nature of the VHF Frequency Band.

This application contains one new NTIA (Federal) pool frequency used as a Trunked Repeater Output, to replace a Part 90.20 (Public Safety Pool) frequency that was interfering with the Poland Fire Department.

This site contains:

- NTIA (Federal Pool) authorizations
- 90.20 Frequencies licensed to the State of Maine

This attachment shows that while the instant applications may appear to be unpaired, the below table provides the requisite clarity of the pairing anticipated.

Site Name	Sta. Class	Freq (MHz)	Pool	Coordinator	Coordinator App. No.	FCC App. NO.	FCC Call Sign
Sugarloaf Mtn	FB8 / MS-2	172.8125	NTIA	IRAC	I120251	0005619326	WQRJ583
Sugarloaf Mtn	FB8 / RN	172.5750	NTIA	IRAC	I140055	Pending	WQRJ583
Sugarloaf Mtn	MO8 / MS-2	154.8900	20 DOT	AASHTO	A052213000799	0005802412	WQPS334
Sugarloaf Mtn	MO8 / RN	154.7700	20 DOT	AASHTO	A092412002225	0005424191	WQQJ299
